Proposal to create and add a new HL7 AU profile of STU3 List profiled for Assertion of No Relevant Finding.

The purpose of this profile is to provide a generic structure for providing statements that there is a clinical judgement that there are no items of specific interest, e.g. allergies, no medications. It is typically expected to be used in continuity of care or transfer or care related lists and composition sections. One possible use scenario is in a summary document to positively state that there is no known history of conditions for a patient.

Proposed Profile Description	Proposed Metadata & Notes
<p>List, profiled:</p> <ul style="list-style-type: none"> • derived from http://hl7.org/fhir/STU3/list.html • short: "" • definition "" • 0..1 subject Reference(Patient Group) • 0..1 extension source-role Reference(PractitionerRole) <ul style="list-style-type: none"> ◦ short description: Practitioner role that authored the list • 0..* entry with must support <ul style="list-style-type: none"> ◦ 0..1 extension change-description ◦ flag binding: FTR-???(required) ◦ entry.item Reference(MedicationStatement) with must support <p>description: "Australian realm List profile for medicine list ."</p>	<p>Name: AUMedicineList</p> <p>Title: AU Medicine List</p> <p>URI: http://hl7.org.au/fhir/StructureDefinition/medlist</p> <p>Notes</p> <p>New code system with value set for flag Medication change status. Suggest the v: allows 'nochange' and the children of 'ch' 'recommended' but not actually include t 'changed' and 'recommended'.</p>
<p>Extension, profiled:</p> <ul style="list-style-type: none"> • 1..1 url "http://hl7.org.au/fhir/StructureDefinition/change-description" • 1..1 valueString <p>"description" : "Description of the change including reason for change."</p>	<p>Name: ChangeDescription</p> <p>Title: Change Description</p> <p>URI: http://hl7.org.au/fhir/StructureDefinition/change-description</p> <p>ContextOfUse: List.entry</p> <p>Notes</p>

	Name: ListSourceRole
	Title: Authoring PractitionerRole
Extension, profiled:	URI: http://hl7.org.au/fhir/StructureDefinition/source-role
<ul style="list-style-type: none">url	ContextOfUse: List
<ul style="list-style-type: none">"http://hl7.org.au/fhir/StructureDefinition/source-role"1..1 valueReference Reference(PractitionerRole)	
"description" : "A practitioner role that authored this list."	Note: This extension is included as R4 preadoption include guidance on when to use the extension expectations on use in regards to including element - possibly include as invariant?

The table below presents a Differential Table view of the proposed profile.

URI: <http://hl7.org.au/fhir/StructureDefinition/au-medlist>

Name	Flags	Card.	Type	Description & Usage
List				
source-role			Reference (PractitionerRole)	Practitioner role
subject		0..1	Reference (Patient Group)	
entry		0..*	BackboneElement	
change-description		0..1	string	Description of the change
flag		0..1	CodeableConcept	URL: http://hl7.org.au/description
item		1..1	Reference (MedicationStatementSummary)	Binding: binding concepts from the code system - the
